

This page displays Button Shortcode examples. Button shortcodes accept the following parameters:

- **color** - Available colors (blue, red, green, purple, orange, grey, brown, black, yellow, pink, teal)
- **textColor** - Enter a hexadecimal value (ex. #FFFFFF)
- **type** - Available types (small, medium, large)
- **url** - Pass in a URL value (ex. "http://www.google.com")
- **target** - Choose whether a button opens in a new window or not ("_blank" or "_self")

Note: parameters must be wrapped quotations.

Small Button

```
(hopeButton type="small" color="blue" textColor="#FFFFFF" url="http://www.google.com" target="_blank")Small Button(/hopeButton)
```

Small Button

```
(hopeButton type="small" color="purple" textColor="white")Small Button(/hopeButton)
```

Small Button

```
(hopeButton type="small" color="green" textColor="black")Small Button(/hopeButton)
```

Small Button

```
(hopeButton type="small" color="orange" textColor="black")Small Button(/hopeButton)
```
