

This page displays the Social Media Shortcode example. This shortcode accepts any FontAwesome icon value - see a list of available icons [here](#).

To add social icons simply create a socialGroup container first followed by any amount of socialIcon shortcodes. Here is a full list of parameters for the socialIcon shortcode:

- icon
- size
- color
- link
- target

(socialGroup)

```
(socialIcon icon="facebook" size="10" color="#3C599B" link="http://www.facebook.com" target="_self")(/socialIcon)
```

```
(socialIcon icon="twitter" size="10" color="#32CCFE" link="http://www.twitter.com" target="_blank")(/socialIcon)
```

```
(socialIcon icon="dribbble" size="10" color="#D95232" link="http://www.dribbble.com" )(/socialIcon)
```

```
(socialIcon icon="tumblr" size="10" color="#1D87BD" link="http://www.tumblr.com" )(/socialIcon)
```

```
(socialIcon icon="android" size="10" color="#009DF7" link="http://www.android.com" )(/socialIcon)
```

(/socialGroup)
